Use case | Verified billing

Software that invoices for thousands of businesses. And the legal date is not the one in the press note.

What the vendor and the accountancy firm must be able to show before 1 January 2027, and how one partner carries billing, banks and tax.

1 Jan 2027
companies, according to the official gazette

Oct 2028
a delay that is announced, not published

1
declaration of responsibility per version

THE FIRM IS THE LARGE CLIENT

One practice pulls dozens of businesses onto the same version.

THE CHALLENGE

The client is asking today even if the note talks about 2028.

WHAT THIS PROFILE PAYS FOR TODAY

- The gazette date and the Ministry note do not match →
- Every version of the software needs a declaration of responsibility →
- Chained records, a hash and invoice retention →
- Accountancy firms with hundreds of clients on one platform →
- Banks, the shop and tax on the same data →
- The client's question does not wait for the delay →

ITS MARKET

The same software, three clients sole trader, company and accountancy firm.

The dates are from the gazette and the Ministry. The scale is one product in the sector, cited with its source.

1 Jan 2027

companies must have the system adapted; everyone else, before 1 July 2027

OFFICIAL GAZETTE, RD 1007

Oct 2028

the Ministry announces a delay that is not yet published in the gazette

MINISTRY OF FINANCE

1,266

accountancy firms run more than 21,000 companies on one product in the sector

FORBES, 21 SEP 2026

FIRMS IN THE SECTOR

Quipu	Billing, tax and banks. It marks January and July 2027
Anfix	Billing and accounting with a Verifactu mark, also for accountancy firms
TS Facturas	Online billing (formerly Billin), adapted to Verifactu
Holded	Cloud billing, accounting and banks, with Verifactu included

A product that bills for the sole trader, the company and the firm that serves both has more technical surface than one that only emits a PDF.

WHAT WE PROPOSE

One technology partner for the product and for the firm.

The same counterpart covers the billing record, the banks, the accountancy firm and the evidence the client asks for.

Board

One date, not two

The roadmap follows the gazette. The Ministry note is watched, not executed.

Accountancy firms

One version for the whole practice

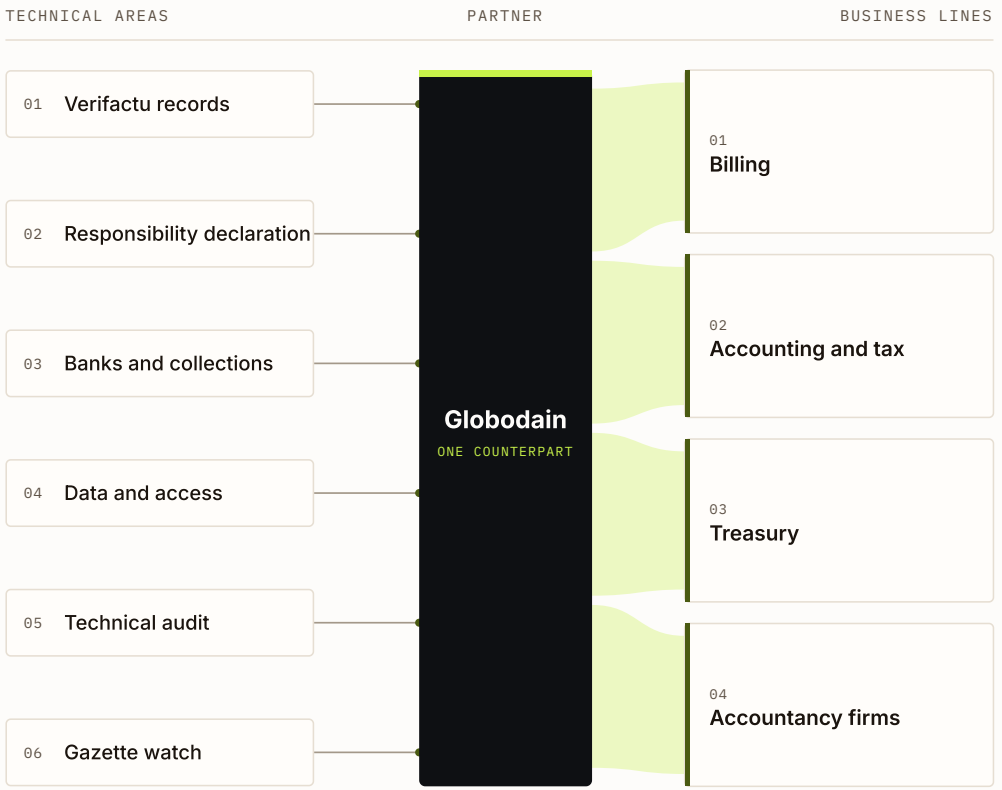

Opening a new client does not reopen the design of the record.

Technical team

Capacity that adds

Reinforcement on records, data and integrations, without replacing the team.

FROM SEVERAL VENDORS TO ONE PARTNER

6 TECHNICAL AREAS

1 PARTNER

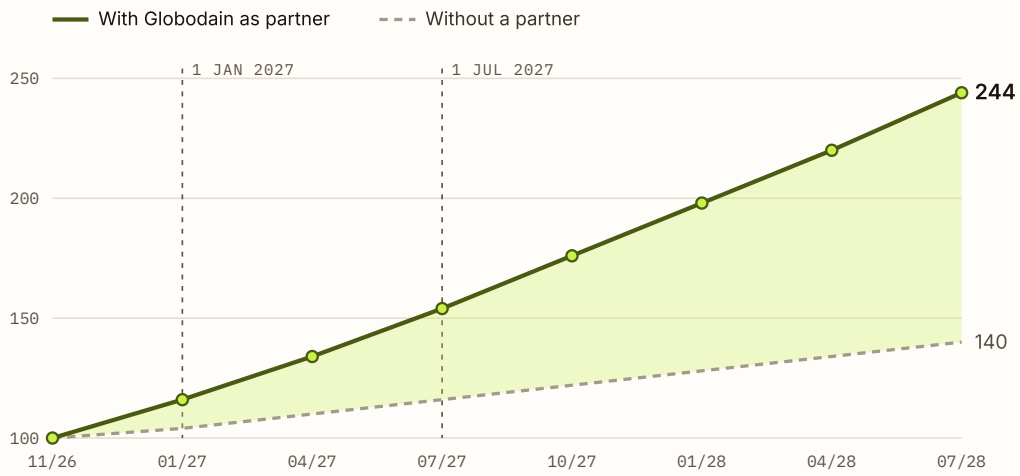

4 BUSINESS LINES

EXPECTED IMPACT

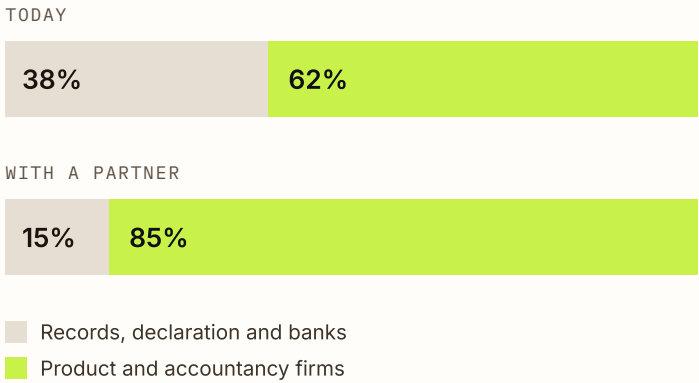

More practices served with the same team.

What changes when the record, the declaration and the bank connections stop being rebuilt per client.

CLIENTS IT CAN SERVE

WHERE THE TECHNICAL TEAM'S TIME GOES

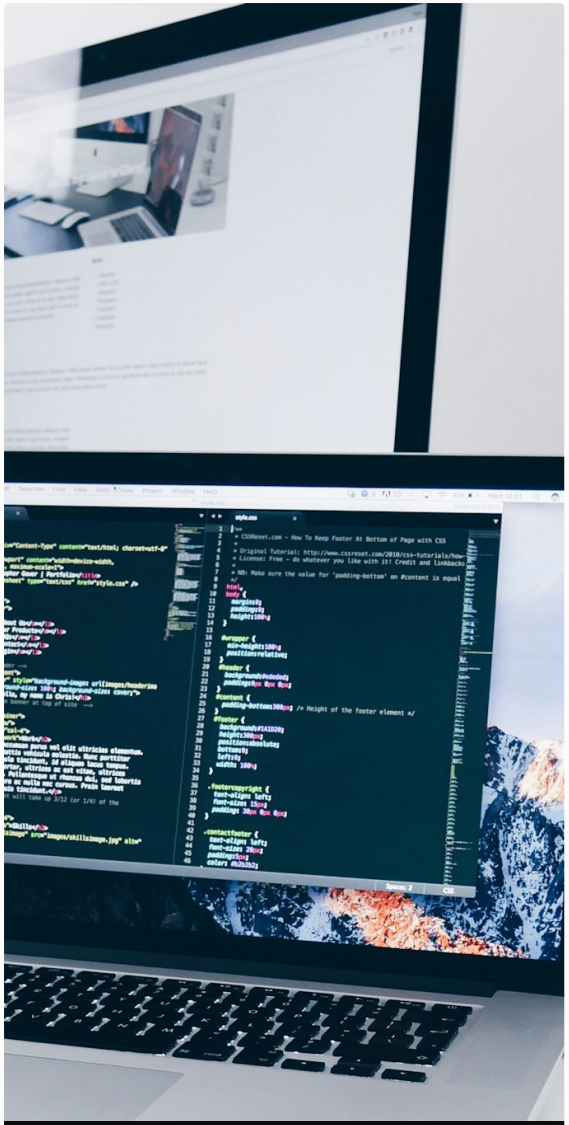

×1.7
clients the product can serve by the end of the period, versus staying without a partner

−23 pts
of technical time that returns to product and accountancy firms

6 → 1
technical areas, one counterpart

Illustrative scenario, not a forecast. Index 100 = clients the product can serve in Nov 2026. Assumption: freed time goes back to product and to signing accountancy firms.

WATCH

The note is read. The gazette is what binds.

HOW WE WOULD SOLVE IT

A continuous rhythm, not a patch for every rule.

Each version of the software ships with the declaration and the record in place.

01

Diagnosis

Records, declaration, banks, the firm's access and data.

02

Audit

A report the board and the practice can both show.

03

Implementation

We fix it with their team, without replacing it.

04

Watch

A warning the day the delay, if it comes, is published.

What we bring | 01

Technical audit, implementation and continuous watch

What we bring | 02

A report of findings and priorities

What we bring | 03

A stable counterpart, not a one-off vendor

BENEFITS AND ADVANTAGES

What this profile gains before January.

01
One working date
The team builds against the gazette and watches the note, without mixing them.

02
The declaration at hand
Every version can be found, as article 13 requires.

03
The firm does not reopen the design
A new accountancy practice joins the same platform.

04
Banks on the same data
The movement and the invoice do not live in two places.

05
One partner
Billing, tax, treasury and accountancy firms, one relationship.

06
The team on the product
Technical time goes back to sign-ups and the roadmap.

THREE WAYS TO COVER IT

	Hire in-house	Several vendors	Globodain as partner
GETTING STARTED	Months of hiring	Weeks per vendor	**From the diagnosis**
COUNTERPARTS	One, with gaps	One per rule	**One, for everything**
COST	Fixed and high	Scattered	**Predictable**
WORKING DATE	Whichever is remembered	Different per area	**The gazette**
EVIDENCE FOR THE CLIENT	Still to build	Separate	**In one report**

WHY GLOBODAIN

Capabilities that apply to billing software like this.

01

Records

Issue, cancellation, fingerprint and retention, checkable.

02

Declaration

Every version findable, as article 13 requires.

03

Data

The firm's access, processors and retention.

04

Integrations

Banks and collections on the same data as the invoice.

05

Technical audit

A report the practice can show its client.

06

Watch

A warning the day a note becomes the gazette.

WHAT WE DO NOT DO

- We do not certify regulatory compliance
- We do not sign the vendor's declaration of responsibility
- We do not replace tax advice: we complement it

The declaration of responsibility is signed by the producer of the system. Tax advice belongs to third parties. We provide technology support: audit, implementation and watch.

Scope note: mentioning regulated environments describes applicable capabilities, not a proven track record in billing software.
